

Du behöver vass kniv, lim, pincett och lite tålamod. Ritsa viklinjerna, skär ut och montera i nummerordning. Med noggrannhet, eftertanke och lite tur går det att få tryckpressen att fungera.

You need knife, glue, tweezers and some patience. Score folding lines. Cut, fold and glue according to letters, numbers and sketches. With care, reflection and a bit of luck the printing press will work.
